Introduction

The integration of Artificial Intelligence (AI) in UK schools has evolved significantly over recent years, reflecting both technological advances and the educational community's response to the opportunities and challenges it presents.

A consensus is emerging about the benefits of AI to enhance personalised learning and streamline administrative tasks, while also raising concerns around data privacy, ethical use, and the preparedness of teachers to effectively integrate AI tools into classrooms.

This ongoing dialogue reflects the recognition of AI's transformative potential in education, balanced with a need for careful implementation to protect student welfare and promote equitable outcomes. These considerations have helped shape a pathway for embedding AI in schools, focusing on teacher training, ethical guidelines, and fostering digital competency among students.

Legislative Background and Key Documents

There is currently little in the way of specific legislation regarding the use of AI in schools, but guidance has been developed and is being regularly updated as the technology evolves. Schools may wish to consult these guidance documents:

- [AI Roadmap - GOV.UK](#)
- [National AI Strategy - GOV.UK](#)
- [Ofcom's 2024 Online Nation Report](#)
- [EU Artificial Intelligence Act 2024 - Useful high-level 4-point summary of considerations](#)
- [UNESCO AI Competency Framework for Students \(Guidance\)](#)
- [UNESCO AI Competency Framework for Staff \(Guidance\)](#)
- [Responsible AI Toolkit - GOV.UK](#)
- [Data protection in schools - Artificial intelligence \(AI\) and data protection in schools - Guidance - GOV.UK](#)

Context

Generative AI represents a transformative leap in technology, enabling machines to create text, images, audio, and video with remarkable accuracy and creativity. Emerging from advancements in machine learning, particularly deep learning, generative models such as GPT (Generative Pre-trained Transformer) and DALL·E leverage vast datasets to understand and produce content that mimics human expression. Initially text-focused, these models have evolved to become multi-modal, integrating and processing various types of input, such as text and images, to generate cohesive outputs.

Since the debut of early systems like OpenAI's GPT-2 in 2019, the field has rapidly advanced, unlocking opportunities in education while raising critical considerations around ethics, data privacy, and equitable access.

According to [Ofcom's 2024 Online Nation Report](#) more than half of children have used generative AI tools in the past year. Teenagers aged 13-15 are more likely to use AI (66%) than those aged 8-12 (46%) and combining both age groups, over half (53%) have made use of AI to support with homework tasks. There is a broad range of purposes for children using AI including finding information, creating images/videos, seeking advice and summarising text, with the most popular tool among 8-15s being ChatGPT (37%) followed by Snapchat My AI (30%).

At Dovecotes Primary School, we are keen to navigate this landscape thoughtfully, harnessing the benefits of AI for creativity and learning while safeguarding against misuse and bias.

Statement of Intent

Artificial Intelligence (AI) technology is already widely used in commercial environments and is gaining greater use in education. We recognise that the technology has many benefits and the potential to enhance outcomes and educational experiences, with the opportunity to support staff in reducing workload.

We also realise that there are risks involved in the use of AI systems, but that these can be mitigated through our existing policies and procedures, amending these as necessary to address AI risks.

We will educate staff and learners about safe and ethical use of AI, preparing them for a future in which AI technologies are likely to play an increasing role.

The safeguarding of staff and learners will, as always, be at the forefront of our policy and practice.

Related Policies

This policy should be read in conjunction with other school policies, including Data Protection Policy; Staff Discipline policies and codes of conduct; Behaviour policy; Anti-bullying policy; Online safeguarding policy; Acceptable Use Agreements.

Policy Statements

Dovecotes Primary School acknowledges the benefits of the use of AI in an educational context - including enhancing teaching and learning and outcomes, improving administrative processes, reducing workload and preparing staff and learners for a future in which AI technology will be an integral part. Staff are encouraged to use AI-based tools to support their work where appropriate, within the frameworks provided below and are required to be professionally responsible and accountable for this area of their work.

- We will comply with all relevant legislation and guidance, with reference to guidance contained in Keeping Learners Safe;
- We will provide relevant training for staff and governors in the advantages, use of and potential risks of AI. We will support staff in identifying training and development needs to enable relevant opportunities.
- We will ensure that, within our education programmes, learners understand the ethics and use of AI and the potential benefits and risks of its use. Dovecotes Primary School recognises the importance of AI literacy as a crucial skill for the future, equipping learners for responsible and resilient use of these systems and have addressed AI skills as part of the curriculum.
- Dovecotes Primary School will use AI responsibly and with awareness of data sensitivity. All staff should use AI tools responsibly, ensuring the protection of both personal and sensitive data. **Staff should only input anonymized data to avoid the exposure of personally identifiable or sensitive information.**
- Compliance with Data Protection Standards. Staff should always ensure AI tools used comply with GDPR and other data protection regulations. They must verify that tools meet data security standards before using them for school-related work.
- **Only those AI technologies approved by the school may be used. Microsoft CoPilot is the main recognised, approved technology. Any other websites or applications must be approved by the Head Teacher before use.** Staff should, where possible, use school-provided AI accounts for work purposes. These accounts are configured to comply with organisational security and oversight requirements, reducing the risk of data breaches.
- Staff must not input sensitive information, such as internal documents or strategic plans, into third-party AI tools unless explicitly vetted for that purpose. They must always recognize and safeguard sensitive data.

- Dovecotes Primary School will ensure that when AI is used, it will not infringe copyright or intellectual property conventions – care will be taken to avoid intellectual property, including that of the learners, being used to train generative AI models without appropriate consent.
- Staff must report any incidents involving AI misuse, data breaches, or inappropriate outputs immediately to the relevant internal teams. Quick reporting helps mitigate risks and facilitates a prompt response.
- **Dovecotes Primary School will audit AI systems** in use and assess their potential impact on staff, learners and the school's systems and procedures, creating an AI inventory listing all tools in use, their purpose and potential risks – see appendix.
- We are aware of the potential risk for discrimination and bias in the outputs from AI tools and have in place interventions and protocols to deal with any issues that may arise. When procuring and implementing AI systems, we will follow due care and diligence to prioritise fairness and safety.
- *Dovecotes Primary School will support parents and carers in their understanding of the use of AI in the school.*
- *AI tools may be used to assist teachers in the assessment of learners' work and identify areas for improvement. Teachers may also support learners to gain feedback on their own work using AI.*
- *Staff should ensure that documents, emails, presentations, and other outputs influenced by AI include clear labels or notes indicating AI assistance. Clearly marking AI-generated content helps build trust and ensures that others are informed when AI has been used in communications or documents.*
- **We will prioritise human oversight. AI should assist, not replace, human decision-making. Staff must ensure that final judgments, particularly those affecting people, are made by humans and critically evaluate AI-generated outputs. They must ensure that all AI-generated content is fact-checked and reviewed for accuracy before sharing or publishing. This is especially important for external communication to avoid spreading misinformation.**

Improper use of AI tools, including breaches of data protection standards, misuse of sensitive information, or failure to adhere to this agreement, will be subject to disciplinary action as defined in Staff Disciplinary Policy.

Responsibilities

Headteacher and Senior Leaders are responsible for the strategic planning of how AI will be used in Dovecotes Primary School, establishing AI policies and procedures and ensuring that all staff receive relevant training and have a clear understanding of these.

Designated Safeguarding Leads (DSLs) and Online Safety Lead/Deputies are responsible for Online Safety in school. They are expected to have knowledge of AI and its safeguarding implications and an in-depth working knowledge of key guidance. We ensure that they receive appropriate specialist training, commensurate with their role and that ongoing training is provided for all school staff.

Data Protection Officer (DPO) will be responsible for providing advice and guidance about data protection obligations in relation to the use of AI, including related Data Protection Impact Assessments (DPIAs).

Technical Staff will be responsible for technical support and guidance, with particular regard to cyber security and the effectiveness of filtering and monitoring systems.

Staff will have read and understood this policy and associated Acceptable Use Agreements. All staff must report any incidents or suspected incidents concerning the use of AI in line with school policy. All staff will challenge any inappropriate behaviour. Staff have a duty to ensure that:

- the school environment is safe
- sensitive and confidential data / information is secure
- that their actions do not put the reputation of the school at risk and that
- learners understand their responsibilities

Governors will have a good understanding of how AI is used in a school context and potential benefits and risks of its use. They will receive regular training and updates, enabling them to support the school and challenge where necessary. This may include evaluation of the use of AI in the curriculum, administration and communications, ensuring that risks relating to these issues are identified, that reporting routes are available, and that risks are effectively mitigated.

Parents and carers will be supported with their understanding of AI with regular in-school sessions, sharing of newsletters and Online Safety Newsletters, sharing of information on the school website and curriculum information. Our parents and carers are made aware of how AI is used in school and receive guidance on both good practice in its use and the risks of misuse that may affect children's learning or safety. They are encouraged to report any concerns to the school and are made aware that all incidents will be handled with care and sensitivity.

Vulnerable Groups

We recognise that vulnerable learners are more likely to be at risk from the misuse of AI (both in their own use or through the actions of others). We ensure that vulnerable learners are offered appropriate support to allow them to gain full benefit of the use of AI, while being aware of the potential risks.

Children are considered to be vulnerable data subjects and therefore any process involving their personal data is likely to be “high risk”. If an AI / automated process is used to make significant decisions about people, this is likely to trigger the need for a Data Protection Impact Assessment (DPIA).

Reporting

Our reporting systems are well promoted, easily understood and easily accessible for staff, learners and parents/carers to confidently report issues and concerns, knowing these will be treated seriously. All reports will be dealt with swiftly and sensitively and outcomes shared where appropriate. We also respond to anonymous reports, or reports made by third parties. This can be done via:

- Reporting directly to DSL/Headteacher or DDSLs/DOSL
- Reporting to child’s class teacher
- Email to school contacts
- Reporting via website through Worry Box (can be done anonymously)
- Reporting through SLT documentation i.e. website blocking
- Reporting through national organisations, e.g. CEOP
(can be accessed through school website).

Responding to an incident or disclosure

Our response is always based on safeguarding principles and follows school processes. We take a calm, considered and appropriate and put the learner at the centre of all decisions made.

- All AI incidents (including data breaches and/or inappropriate outputs) must be reported promptly to the relevant internal teams. Effective reporting helps mitigate risks and facilitates a prompt response.
- Where relevant / required incidents will be reported to external agencies e.g., Police, LADO, DPO, ICO.
- All AI related incidents will be recorded through the school’s normal systems.

In the case of misuse of AI by staff, the normal disciplinary processes will be followed.

Risk assessment

It is key that our approach to managing risk aligns with, and complements, our broader safeguarding approach.

At Dovecotes Primary School, we understand that despite many positive benefits in the use of AI, there are some risks that will need to be identified and managed, including:

- Legal, commercial, security and ethical risks
- Data Protection
- Cyber Security
- Fraud
- Safeguarding and well-being
- Duty of care

To this end, the school has chosen to use the following AI systems: **Microsoft CoPilot**.

Education

Our school's educational approach seeks to develop knowledge and understanding of emerging digital technologies, including AI.

This policy outlines our commitment to integrating Artificial Intelligence (AI) responsibly and effectively within our school environment. By the use of AI technologies, we aim to:

- Enhance Academic Outcomes: Improve educational experiences and performance for pupils.
- Support Teachers: Assist in managing workloads more efficiently and effectively.
- Educate on AI Use: Promote safe, responsible, and ethical AI practices among staff and pupils.
- Develop AI Literacy: Incorporate AI as a teaching tool to build AI skills and understanding.
- Prepare for the Future: Equip staff and pupils for a future where AI is integral.
- Promote Educational Equity: Use AI to address learning gaps and provide personalised support.

Our school's approach is to deliver this knowledge and understanding wherever it is relevant within the curriculum. This will include:

- Online Safety Framework, including through Project Evolve
- Personal and Social Education, through our teaching of Jigsaw
- Cross curricular programmes, including Literacy
- Discrete subjects, including Computing as well as through discrete opportunities, including assemblies and Safer Internet Day.

Our approach is given the time it deserves and is authentic i.e., based on current issues nationally, locally and within our setting's risk profile. It is shaped and evaluated by learners and other members of the school community to ensure that it is dynamic, evolving and based on need. We do this by:

- *Learner assessment (including surveys at the beginning of each academic year)*
- *Evaluation of emerging trends and research findings*
- *Focus groups*
- *Parental engagement (including workshops and newsletters)*
- *Staff consultation*
- *Staff training*

The following resources are used:

- [Generative AI – Hwb guidance](#) - Resources, guidance and information for education practitioners, learners, and families on generative AI.
- [Hwb - Sharing nudes and semi-nudes: Responding to incidents and safeguarding children and young people](#)
- [UKCIS Sharing nudes and semi-nudes: advice for education settings working with children and young people](#) (including updated AI reference)
- Project EVOLVE - <https://projectevolve.co.uk>
- Jigsaw - <https://jigsawpshe.online/>
- [UKCIS DSIT “Education for a Connected World”](#)

In line with good practice, we have created child-friendly versions of key safeguarding policies, produced and regularly evaluated in consultation with young people. This is done through our Acceptable Usage Policies with our Digital Leaders and Online Safeguarding Group, who meet throughout each academic year.

Training

As AI becomes an integral part of modern education, it is essential for staff to be trained in its effective use. Training equips educators with the knowledge and skills to integrate AI tools responsibly into teaching, learning, and administrative processes. It ensures that AI is used to enhance educational outcomes, streamline workloads, and promote equity while safeguarding ethical practices and data privacy. By fostering AI literacy, staff can confidently prepare pupils for a future where AI is a key driver of innovation and opportunity.

- We will provide comprehensive training to all staff on the effective, responsible, and ethical use of AI technologies in education, ensuring these tools enhance teaching, learning, and administrative processes.
- We will integrate AI-related risks and safeguards into annual safeguarding training, aligning with statutory guidance, including "Keeping Learners Safe."
- We will ensure all staff are equipped with the knowledge and skills to confidently integrate AI into their professional practice and to prepare pupils for a future shaped by AI-driven innovation and opportunities.
- We will train staff to identify, assess, and mitigate risks associated with AI technologies, including issues such as biased algorithms, privacy breaches, and harmful content.
- We will train staff on robust data protection practices, ensuring compliance with UK GDPR and other relevant regulations while using AI systems.
- We will promote ethical practices in the use of AI, ensuring that these technologies contribute to equity, fairness, and inclusivity in education.
- We will empower educators to teach pupils about the safe and ethical use of AI, cultivating a culture of awareness, resilience, and informed decision-making in the digital age.
- We will train staff to use AI responsibly as a tool to monitor and address online risks, reinforcing our commitment to a safe learning environment.

Staff training resources include:

- [Generative AI – Hwb guidance](#) - Resources, guidance and information for education practitioners, learners, and families on generative AI.

Appendix A – Risk Assessment

The following risk assessment matrix has been used to identify, evaluate and mitigate risks associated with implementing AI in school.

Risk Assessment Matrix – Microsoft Copilot

Risk Area	Risk Description	Likelihood (Low/ Med/ High)	Impact (Low/ Med/ High)	Risk Level (Low/ Med/ High)	Mitigation Measures
Data Protection and Privacy Breaches	Unauthorized access to sensitive student data or personal information, leading to safeguarding concerns and commercial risk.	Medium	High	High	Implement strong encryption, regular audits, and GDPR-compliant data management policies. Ensure no personal data inputted; staff to oversee.
Cyberbullying	Use of AI tools to harass or bully students.	Medium	High	High	Monitor AI communication tools and interactions and provide reporting mechanisms. Student support offered.
Over-reliance on AI	Dependence on AI tools for decision making without human oversight, reducing interpersonal interactions among students and teacher autonomy.	Medium	Medium	Medium	Ensure human oversight and review of AI decisions. Encourage collaborative learning activities and balance AI with social engagement.
Emotional Manipulation	AI influencing students' emotions negatively and affecting student mental health through curated content.	Low	High	Medium	Implement ethical guidelines for AI interactions; monitor AI-generated content, involve mental health professionals.
Inappropriate Content or Conduct	Exposure to harmful or inappropriate content via AI	Medium	High	High	Filter and monitor content accessed through AI; humans to oversee.

Mental Health Impacts	Negative effects on students' mental health due to AI interactions; overuse causing anxiety/stress/dependency.	Medium	High	High	Provide mental health support/resources and monitor AI interactions/set expectations on its usage.
Bias and Discrimination	AI exhibiting biased behaviour or discrimination.	Medium	High	High	Regularly audit AI systems for bias and discrimination; humans to oversee.
Misuse of AI	Improper use of AI tools by students or staff for harmful, unethical or illegal purposes.	Medium	Medium	Medium	Provide training on proper use of AI tools and educate learners on responsible and appropriate usage.
Misinformation	Spread of false, harmful or misleading information through AI tools.	High	High	High	Educate staff and users to verify information provided by AI and educate on misinformation.
Digital Divide	Unequal access to AI tools among students.	Medium	High	High	Ensure equitable access to AI tools for all students and ensure alternative resources available.
AI Ethics Awareness	Lack of awareness about ethical use of AI among students and staff.	Medium	Medium	Medium	Conduct training and educational sessions on AI ethics and responsible usage.
Data Accuracy	Inaccurate data used by AI leading to misleading recommendations.	Low	High	Medium	Regularly update and verify data used by AI systems; humans to oversee.
Legal Compliance	Non-compliance with legal regulations regarding AI usage in schools.	Low	High	Medium	Stay updated with legal requirements and ensure compliance.
Cyber-Security	Increased use of AI in cyber attacks; Threats to the security of AI systems.	High	High	High	Implement robust cybersecurity measures; educate staff and learners on safe online practices.

Appendix B – Action Plan

1. Appoint a safeguarding lead to oversee AI implementation and its impact on student welfare – DSL/DDSLs and deputy OSL.
2. Conduct a staff survey to understand staff needs around training.
3. Deliver regular training for staff on online safety, AI ethics, and responsible use.
4. Audit the curriculum to identify where these AI-related issues might be incorporated into existing or new curricular programmes.
5. Establish transparent reporting mechanisms for any safeguarding or wellbeing concerns linked to AI.
6. Collaborate with parents and carers to raise awareness about AI risks and best practices.
7. Conduct annual reviews of AI tools and their impact on student wellbeing, updating the risk matrix as needed.
